

## Product Version Compatibility Matrix

To upgrade to the latest desired version of Operations Manager, operators should first upgrade each product to the minimum required version that is certified to run in the version of Operations Manager they intend to upgrade to.

Once every product is upgraded, the Operator can then safely upgrade PCF Operations Manager.

The visuals depict intra-product upgrades vertically and Operations Manager compatibility horizontally.

Can  
Upgrade

Runs on  
vSphere

Runs on  
AWS

Runs on  
OpenStack
