

Product Compatibility Matrix

To upgrade to the latest desired version of Operations Manager, operators should first upgrade each product to the minimum required version that is certified to run in the version of Operations Manager that they intend to upgrade to.

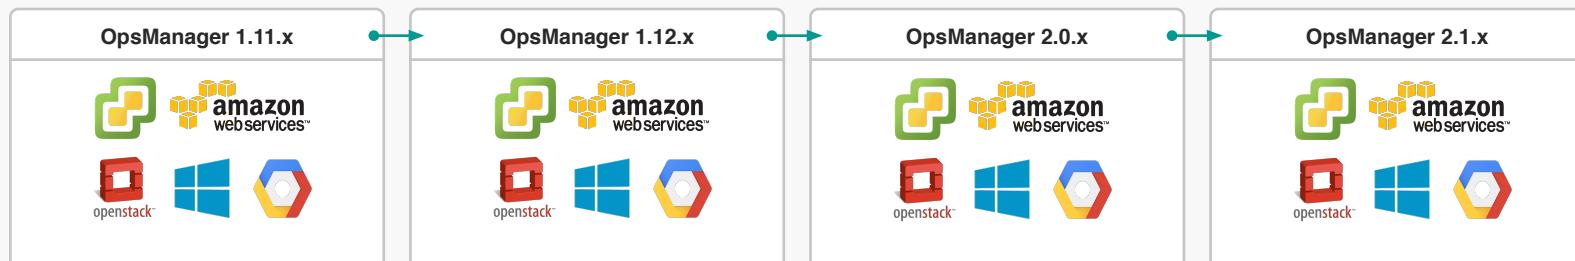

Once every product is upgraded, the operator can then safely upgrade PCF Operations Manager.

*PCF Services are supported but not necessarily verified on versions of OpenStack and vSphere certified for OpsManager; see specific service documentation for details.

(OpsManager 1.11.x supports NSX-V 6.2+.)

(You must upgrade Pivotal Application Service and OpsManager simultaneously.)

Pivotal Cloud Foundry Services

Notes for JMX Bridge:

- You must upgrade JMX Bridge and OpsManager simultaneously.
- JMX Bridge v1.9 and v1.8 is deprecated for PCF v2.1 and later.
